

Protective Lining Corporation

Elastic Drum Covers and Top Sheets

The practical and inexpensive way to protect products from outside elements.

Elastic Dust Covers

Tight fitting elastic dust covers protect in plant or bulk packaged products from outside elements such as dust, grease and water that might cause contamination. We use a 4-mil LDPE film. The elastic band is long lasting.

Good for applications such as: food, chemical, pharmaceutical.

Available in other custom sizes and thicknesses. Standard sizes are 5, 30 and 55 gallon.

Square & Round Top Sheets

These products are converted to fit over any pail or drum. Square sheets are used primarily for open head drums when packaging and processing in a plant. Round shaped sheets are used for added protection when covering products with a lid.

Good for all industrial applications. Available in other custom sizes and thicknesses. Standard sizes are 5, 30 and 55 gallon.
